REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The present application relates to an operating information control system of a construction machine. According to the claimed invention, there is provided means at the construction machine for collecting operating information regarding the construction, a first receiving device at a base station for receiving information from the construction and a storage means at the construction machine for storing operating information. The claimed invention also sets forth a detector means for detecting that the construction machine has left the base station and for detecting that the construction machine has returned to the base station and a transmission controller for transmitting operation information read from the storage means to the first receiving means through a wireless radio having a limited range. According further to the claimed invention, the transmission controller further includes means responsive to a signal from the detector means that the construction machine has returned to the base station for transmitting the operating information read from the storage means to the first receiving device through the wireless radio. The prior art of record fails to disclose means responsive to a signal from the detector means that the construction has returned to the base station for transmitting the operating information read from the storage means to the first receiving means. The aforementioned limitations and combination thereof are taught in the prior art. In light of the foregoing, the claims of the present application are found to be patentable over the prior art of record.
